

"How to Quickly and Easily Set-up Fully Automated Internet Businesses in 42 Days or Less"

By Terry Dean

Imagine this. You get up at 10 o'clock in the morning. Grab a cup of coffee and make the 30 second commute to your home office. Flip on your computer and pull down your email.

You look over the emails and you have 27 order notification messages waiting for you. You sold \$978 worth of products since last night.

Not bad...considering you spent most of the day shopping. Just think what you could have done if you actually worked yesterday.

This is my reality...and I couldn't have dreamed it would be this good 6 years ago.

I'm just a small town guy from Indiana...nothing special. I'm not a "genius" like so many claim to be. I'm even a college dropout. I'll tell you a little bit more about myself later.

You're interested in my unique discovery.

I've discovered a simple Internet system which can generate Money-On-Demand...and I duplicate this same system again and again as often as I want.

It takes me a few days to set up each income stream. The beauty is I do this once...and the system runs on full auto-pilot from that point on. Visitors are automatically sent to my web site (at no cost to me). They read my ads. They place orders.

The orders are automatically processed and the money is

deposited in my bank account. The products are delivered online to customers instantly. In a few cases the products are shipped out for me. Either way, the process doesn't require me to lift a finger!

I've got dozens of these little income streams all running for me..

The beautiful part of the whole deal is that I do every single one of these income streams in the EXACT same way. I've basically created a model...and I follow that model every time I want to create a new income.

I've basically "packaged" Internet success into a system. Just do A, B, and C...and you'll make money online.

My system is based on 6 steps which take me a week or two to accomplish. If you're just starting out it will probably take you longer. So I'd plan for around 6 weeks for the average person willing to put in some effort to complete my system.

Here are the 6 steps I follow...

1. Find a starving group of customers desperate to buy a product from you.

Here's the mistake most people make in online marketing. They have a product nobody wants...and they're looking for someone to buy it.

Turn that around. Find a group of people who are hungry to buy something. Then sell it to them. How much easier could it be? Find out what they want...and sell it to them.

That's the key to Internet profits. OK. So your question is how do I find these people? Well, that's pretty simple also. There are five ways I specifically find a group of hungry customers in any niche audience.

But I want to just give you one right here.

You can get a free top 500 listing of most researched keywords at

<http://www.wordtracker.com/report.html>

Look at this report every week and you'll know exactly what people are searching for online. All you have to do is get in front of this hungry audience.

2. Follow a proven system of developing your product quickly.

Forget writing your product. That takes way too long. You need to understand my proven system for getting other people to develop your product for you!

There are several methods of getting this done, but let's talk about the easiest way.

Contact 10 experts on the subject and ask each of them to provide you some information for the product. You combine all of the information from the experts and you build a product out of it.

Why will they do this? It's simple. They get exposure since you'll obviously be talking about how good their information is and you'll be linking to them. They make money from potential clients they'll receive.

You make money by selling access to their information... without having to create anything of your own.

3. Generate order producing sales copy that pulls in orders left and right.

What really causes someone to buy online?

Find out the truth from someone who has done this full-time for six years. It doesn't require a great imagination.

It just requires you to follow instructions and a formula. Quit trying to sit down and "write" ad copy yourself. Anything you write will always have low responses.

You need to simply understand how great copywriters legally "swipe" ad copy to create their own sales pieces.

You can use words which have already been written and have been proven to generate millions of dollars in orders. Find out how to do it right...and how to keep from doing it wrong.

4. Create a powerful email follow-up system that doubles your conversion rate.

It's no secret.

Using email follow-up is a proven way to boost online sales. In fact, with a good strong email follow-up system you can double or triple your sales almost overnight.

If you're not using email, then you're losing money.

It's not as hard as you think either. Just like in copywriting, you don't have to become a great writer. You simply have to use an already proven model of success for selling your products and services.

In fact, being a great writer will actually hurt your sales. You'll end up wanting to do things your way and you'll destroy the entire sale process.

Making money online is simply a result of following this system. Don't add to it and don't take away from it.

5. Make some money while testing your offer.

The next step is to test your offer using very low priced OR free traffic generating methods. Forget all the hoopla you hear constantly online.

There are only a few systems I use for generating "test" traffic. You'll learn each of them in our big course (along with the exact steps to take to maximize your profits), but here's one of them for free.

Ezines are one of the best ways to generate highly qualified traffic to a new offer. You can often double or even triple your money with a good offer in many ezines. So they're always one of my first marketing steps.

By the way, there is a simple formula for generating

maximum response from an ezine ad also. Don't tell people everything in ad. Just tell them enough to get them curious enough to click on a link to your web site. Then make the sale from your site.

So don't tell people what the product is in the ezine ads. Get them to wonder about it. Then when they click to find out, they'll see your powerful order pulling copy (which you created off the proven recipe).

6. Rollout the offer to millions for big time profits.

Once you've seen the ad pull in profits, now it's time to roll out your advertising to millions. Getting millions of visitors really isn't anything of a big secret. All you have to do is follow the recipe.

Here's a hint...The reason you wanted to test your offer first was so you know exactly how much each visitor is worth to your web site. You'll now use this information to create an unstoppable order pulling system...and you'll have thousands of sites generating traffic for you.

It's 100% risk free to you...and it's the doorway to making real money online.

I'll bet you guessed it right. An affiliate program is involved...but there's definitely a whole lot more to it than just that. Find out why some affiliate programs make millions and others are lucky to make their hosting payment each month.

I've given you an outline of my system above, and I'll be sending you more information over the next few days.

I want to leave you with a final thought. I know what you're thinking. You're probably saying that this all just sounds too simple...OR that you've failed before.

But I want to tell you...

"If I can do it, then you can do it too."

If a person who was dead broke, over \$50,000 in Debt, and delivering pizzas at Little Caesar's for \$8 an Hour...can

earn as much as \$31,324 a DAY in NET PROFITS from an online business...then YOU can do it too.

I know what it's like to be dead broke. There was a time when my wife and I would search the living room furniture for change to go out to eat at McDonald's. We lived in a tiny rental house for \$340 a month. The kitchen and bathroom had huge leaks and water damage.

We had over \$50,000 in debts from one car payment and 13 credit cards. We never answered the phones, because it would always be another credit collection agency demanding payments we didn't have.

I tried opportunity after opportunity...including mail order, network marketing, and direct sales. You name it...and I tried it. I just couldn't find anything that worked for me. Each of those opportunities just ended up taking up more space in my basement and being another charge on my overused credit cards.

Then one day back in 1996 I discovered the Internet. It wasn't an easy road. I had to study...work...test...and learn most things by trial and error. There wasn't anywhere near the deluge of Internet marketing information then as there is now.

So I had to learn things the hard way...in the school of hard knocks.

But it began to pay off. I was able to quit my stupid jobs in 6 months (I had more than just the pizza delivery one). Within a year my debts all started to disappear. Soon I was completely out of debt. I moved out of that tiny rental house in the city.

Money flows into my bank accounts automatically 24 hours a day 7 days a week.

My life started to change the day I learned the system to making money online. You can earn a good income online anywhere, anytime you want...simply by using the exact same easy-to-follow steps whenever you want. It's as easy as clockwork...if you know what you're doing.

Terry Dean is the author and creator of the Internet Marketing Protege Program. If you've always wanted a complete

A to Z roadmap of how to earn money online, then this is it. His complete course will show you step-by-step how to create your own automated Internet business starting from ground zero. He even includes a fill-in-the-blank template to follow for each step along the way. Do the assignments he gives you, fill in the blanks, and follow the steps. It's as simple as that:
